MD TANVIR MANNAN

ICT SUPPORT & SYSTEMS PROFESSIONAL | BUILDING AI AND AUTOMATION TOOLS

Gold Coast, QLD | mdtanvirmannan@gmail.com | linkedin.com/in/mdtanvirmannan | github.com/Santo250499

PROFESSIONAL SUMMARY

ICT support professional with 3.5+ years in IT support, currently supporting 2,200+ users across 20+ Lutheran Services sites as an ICT Support Officer (since Aug 2024). Works across Microsoft 365, Entra ID, Intune and Windows Autopilot; has deployed and configured 500+ Windows devices, contributed to a Windows 11 rollout of approximately 500 endpoints, and manages approximately 100 Jira support requests a week. Applies AI-assisted automation to Jira service workflows using Atlassian Rovo and works directly with staff to turn day-to-day operational problems into tested, documented solutions. Outside work, builds AI and automation tools in Python, FastAPI, Streamlit and PowerShell, including a résumé-to-job matching API, an AI job application assistant, a claim payment-status calculator and a lab PowerShell toolkit for Microsoft 365 user onboarding and offboarding. Open to IT support, systems administration and AI or automation roles.

CORE SKILLS

Enterprise IT & Systems	Microsoft 365 (Entra ID, Exchange Online, SharePoint, OneDrive, Teams) • Intune • Windows Autopilot • Windows 10/11 • Windows Server • Active Directory • Group Policy • MFA & Conditional Access • PowerShell • Microsoft Defender • Azure • Apple Business Manager • iOS & Android Management • Enterprise Telephony • Networking (DNS, DHCP, VPN, Wi-Fi) • Jira Service Management
Generative AI & Automation	Microsoft Copilot • ChatGPT (Business) • Anthropic Claude • Prompt Engineering • Jira Rovo AI Automation • AI Agent Fundamentals • LLM Integration (OpenAI API) • Structured Outputs • Workflow Automation • Responsible / Governed AI Use
Development (personal projects)	Python • FastAPI • Streamlit • REST APIs • Git/GitHub • Testing & Error Handling • HTML/CSS/JavaScript • TypeScript • React • Next.js • Tailwind CSS • Supabase/PostgreSQL • SEO fundamentals
Business & Solutions Analysis	Requirements Discovery • Workflow & Process Analysis • Solution Briefs & Design • Process Improvement • User Testing & Adoption Support • Stakeholder Communication • Technical Documentation • Power BI (university coursework)

PROFESSIONAL EXPERIENCE

ICT Support Officer | Lutheran Services

Aug 2024 - Present

- Partner with 2,200+ users across 20+ locations to gather requirements, diagnose issues and translate business needs into practical, tested technology solutions supporting business-critical systems.
- Manage and resolve approximately 100 support requests per week through Jira, analysing user needs and coordinating solutions with technical and non-technical stakeholders.
- Apply Generative AI to operational IT workflows via AI-assisted Jira automation using Atlassian Rovo, identifying opportunities where automation improves service delivery.
- Test, refine and document solutions before implementation, and support user adoption through practical training and guidance.
- Deployed and configured 500+ Windows devices using Windows Autopilot and Intune.
- Contributed to a Windows 11 rollout covering approximately 500 endpoints.
- Administer Microsoft 365 (Entra ID, Exchange Online, Teams, SharePoint, OneDrive); manage accounts, permissions, mailboxes and endpoint configurations in line with data governance and security requirements.
- Troubleshoot VPN, Wi-Fi, DNS, DHCP, printing and network connectivity issues while maintaining technical documentation, asset records and Microsoft Defender endpoint security.

IT Support Technician | Tech Domain

Feb 2023 - Aug 2024

- Gathered customer requirements, investigated technical issues and implemented appropriate hardware, software and infrastructure solutions across customer environments.
- Participated in three enterprise deployment projects spanning desktops, laptops, servers, switches, routers and printers.
- Delivered technical support and infrastructure services, diagnosing and resolving hardware, software and networking issues for a range of stakeholders.
- Performed Windows deployments, hardware installations and infrastructure upgrades across customer sites.

Cybersecurity Analyst Intern | SecureStack

Mar 2022 - Jun 2022

- Assisted with vulnerability assessments, security reviews and technical documentation, building practical understanding of information security risk, data protection and secure technology practices.

SELECTED PROJECTS (PERSONAL, PUBLIC ON GITHUB, 2026)

AI Job Match Agent github.com/Santo250499/job-match-agent

- FastAPI application that compares résumé text with job requirements and returns structured, evidence-based match analysis, in a deterministic demo mode or an OpenAI-backed mode.
- Uses Pydantic structured outputs, input validation, exception handling and environment-based configuration; pytest API tests run in a GitHub Actions CI workflow with a Docker build.

AI Job Application Assistant github.com/Santo250499/ai-job-application-assistant

- Streamlit app that scores a résumé against a job description with local keyword heuristics, and uses the OpenAI API to draft cover letters, recruiter/LinkedIn messages, interview preparation and up to three CV rewrites, with PDF and text downloads.

Microsoft 365 User Lifecycle (lab project) github.com/Santo250499/m365-user-lifecycle

- PowerShell toolkit for Entra ID / Microsoft 365 onboarding and offboarding with the Microsoft Graph PowerShell SDK: CSV onboarding (licences, groups, manager) and offboarding (block sign-in, revoke sessions, remove licences and groups).
- -WhatIf and -Confirm on every change, least-privilege Graph scopes and Pester tests. Lab project with fictional @contoso.com users; not used in production.

Claim Amount Calculator github.com/Santo250499/ai-claim-amount-calculator

- Streamlit app that classifies claim payment-status rows (rule-based), totals pending and paid amounts and exports CSV/XLSX; optional OpenAI image extraction for reading screenshots.

AI Learning Lab github.com/Santo250499/ai-learning-lab

- Bootcamp exercises in Python and the OpenAI API, including a menu-driven résumé analyser (CLI), a chatbot and an email writer.

AI Career Match Dashboard (archived) github.com/Santo250499/ai-career-match-dashboard

- Browser prototype (HTML/CSS/JS) that scores résumé and job-description overlap with client-side keyword rules; no AI API. Archived.

EDUCATION

Bachelor of Information Technology - Networks and Security | Griffith University, Gold Coast Mar 2021 - Jul 2023

GPA: 5.41 / 7.00

- Relevant study: IT Service Management, Information Security Management, Network Security, Advanced Network Architecture, Routing and Internetworking, Digital Forensics.
- Power BI & Data Analytics: completed university coursework/projects using Microsoft Power BI for data analysis, dashboard development and data visualisation.

Bachelor of Information Technology | Central Queensland University, Melbourne Mar 2020 - Feb 2021

- Transferred to Griffith University after receiving the Academic Excellence Scholarship.

ACS Professional Year Program - ICT | QIBA, Brisbane May 2024 - Present

- Australian work-readiness program covering professional communication, workplace practices, report writing, networking and career development.
